West side noise fence installation

Dear West Side Residents,

In an effort to keep you informed about what is happening in your neighbourhood, we are providing you more than a two-week advance notice that starting August 6, project staff will be onsite installing the west side noise fence.

Crews will be onsite installing the wooden noise fence for approximately five weeks. The temporary fencing that is currently onsite will be removed as the new noise fence is installed.

Please see the image below as to what the noise fence will be similar in appearance to. The image below is the existing wooden fence along Montreal Street. The new noise fence will connect with the existing wooden fence.

Other work activity

- Skyline Apartments driveway is being relocated this week (July 22-26) off of John Counter Boulevard. The Third Crossing project team is in close contact with the building managers of Skyline Apartments and will be updating them as we progress through this work. Crews will be onsite through all stages ensuring all activity on site is safe. More information is available on our website.
- In the coming weeks you will notice more site trailers being established on site.

Upcoming engagement on environmental considerations

This summer the project team will be hosting two open houses to discuss our work with Parks Canada and to showcase the evolution of the design and construction methods. The team recently hosted two near neighbour meetings providing information on the construction methods. Those [presentations can be viewed on our website and at this link.](#)

We appreciate your patience as construction activities continue for the Third Crossing on both the east and west approaches. As work continues we want to ensure we have good communications with near neighbours. If at any time you would like to speak with member of the project team, please email us at thirdcrossing@cityofkingston.ca and a team member will be in touch.

Sincerely,
Third Crossing Project Team
